

Bringing Order to Haitian Airport

Toussaint L'Overture International Airport in Haiti is an important place for relief work. It's where supplies come in from other countries. For a while after the earthquake, it was a confusing place.

The terminal building had cracks and could not be used. Planes were parked everywhere. Trucks drove onto the runways to pick up supplies. The supplies got mixed up.

Colonel Patrick Hollrah of the U.S. Air Force says, "Anywhere else, a ramp is a restricted area. Not here."

Hollrah commands a task force that is working to re-open the airport. He says, "This is, unfortunately, what we were made to do."
