

***Discovery* is Back**

The space shuttle *Discovery* landed at Edwards Air Force Base, California, on Friday night. It had been gone for 14 days.

On this mission, *Discovery* took a new crew member to the International Space Station. It also delivered:

- Lab equipment
- An air cleaning system
- A sleeping compartment
- A treadmill (exercise machine) named after the comedian Stephen Colbert

Discovery brought back a Buzz Lightyear toy. It had been on the ISS since May 2008 – longer than any human astronaut.
